Description

Coupling Lock for Plastika – Accessory for Secure Connection of Knife Sheaths and Carrying Systems

The coupling lock for Plastika is a connecting element designed specifically for use with Plastika knife sheaths. It enables the reliable attachment and combination of sheaths on belts or other carrying systems in professional use within food processing. The lock is available as an individual piece and is suitable as a replacement or supplementary part.

Product Features

- Connecting element for coupling Plastika knife sheaths to each other or to carrying systems
- Enables safe and organised transport of knives on the body
- Suitable as a spare part or for extending existing Plastika sheath systems
- Robust design for daily use in food processing and the butchery trade
