Product data

Manufacturer: Friedrich Münch GmbH & Co. KG

Description

NIROFLEX 2000 without Cuff – Cut and Stab Protection Glove for Food Processing

The NIROFLEX 2000 is a cut and stab protection glove made of stainless steel mesh for professional use in food processing, kitchen and counter environments. It protects the hand during cutting and piercing tasks with sharp blades and is designed for daily use in production and kitchen operations. The version without cuff offers a compact fit without extended forearm protection.

Product Features

- Protection against cut and stab injuries when working with knives and blades
- Suitable for use in meat processing, kitchen, counter and food production environments
- Version without cuff for a compact fit directly on the hand
- Food-safe for use in hygiene-sensitive areas
- Robust construction for long-term use in daily professional operations
