Description

Cranked Meat Fork – Reliable Hand Tool for Kitchen and Meat Processing

The cranked meat fork is a professional hand tool for use in food processing, at the meat counter and in commercial kitchens. The cranked design enables ergonomic working when picking up, turning and positioning meat and other food items. The plastic handle ensures a secure grip even under wet working conditions.

Product Features

- Cranked design for ergonomic working and advantageous insertion angle
- Plastic handle for a secure grip even under wet conditions
- Suitable for use in kitchens, meat processing and at the counter
- Robust construction for daily use in professional operations
