Description

NIROFLEX easyfit without Cuff – Cut-Resistant Glove for Kitchen, Counter and Production

The NIROFLEX easyfit is a cut-resistant glove made of stainless steel ring mesh for use in food processing, in the kitchen and at the counter, as well as in production environments. The version without cuff offers maximum freedom of movement at the wrist and is suitable for tasks where a shorter glove form is preferred. It protects the hand when working with knives, skewers and similar cutting tools.

Product Features

- Protection against cut injuries when handling knives and other cutting tools
- Design without cuff for unrestricted wrist mobility
- Suitable for use in commercial food processing, in the kitchen and at the counter, as well as in production
- Suitable for work with skewers and wooden utensils
- Food-safe for direct contact with food
- Washable and reusable
