

Heat Protection Gloves, 35cm

Content: 1

Product data

Description

Heat Protection Gloves – Protection against burns when working with skewers, grills and hot surfaces

The heat protection gloves with a length of 35 cm protect hands and forearms from direct heat exposure when handling hot equipment, grilled food and skewers in production, kitchen and counter environments. The extended cuff provides additional protection for the forearm, where short gloves do not offer sufficient coverage. They are designed for commercial use in food processing and the catering industry.

Product Features

- Protection against burns and heat exposure when working with hot surfaces, grilling equipment and skewers
- Extended cuff provides additional forearm protection

- Suitable for use in kitchen, counter and food production environments
- Designed for commercial requirements
