Description

Flour Scoop 1.3 Litre, Stainless Steel – Hygienic Scooping and Portioning Tool for Kitchen and Production

The flour scoop with a capacity of 1.3 litres is made from stainless steel and is suitable for use with flour and other bulk goods in commercial kitchens and food production. Thanks to the stainless steel construction, it is permanently ready for use and easy to clean. The overall length of 37.5 cm enables ergonomic working even from deep containers or sacks.

Product Features

- Stainless steel construction for permanent use in wet and hygiene-critical environments
- Suitable for flour, bulk goods and similar foodstuffs
- Sufficient handle length for comfortable scooping from deep containers
- Low-maintenance and easy to clean

- Available individually, suitable for daily use in production, kitchen and counter environments
