Description

KASTELL Bow Saw Blade – Replacement Blade for Precise Cutting in Food Processing

The KASTELL Bow Saw Blade is a replacement or interchangeable blade for bow saws as used in food processing, at the meat counter and in the kitchen. It enables clean, controlled cuts through bone, meat and similar materials. As a consumable item for professional use, it is designed to meet the requirements of commercial processing operations.

Product Features

- Suitable for use in meat and food processing as well as in kitchen and counter environments
- Enables precise separation cuts through bone and firm cutting stock
- Designed for continuous commercial use in production and processing
- As a replacement blade, easy to change in order to maintain the cutting performance of the bow saw on an ongoing basis

- Compatible with bow saws for professional use in butchery, kitchen and production
