Description

Hearing Protection with Cord, Detectable – Reliable Noise Protection for Food Processing and Production

These earplugs with connecting cord are designed in a detectable version, making them particularly suitable for use in food processing and other production-critical environments. The soft PU foam plugs provide a high level of noise attenuation with an SNR value of 38 dB and are designed for use in high-noise working environments. The pack contains 200 pairs and is therefore suitable for multiple-use requirements in the workplace.

Product Features

- Detectable – suitable for areas with foreign body detection in food processing
- Soft PU material for high wearing comfort even during extended use
- Connecting cord prevents loss of the plugs and facilitates removal and reinsertion

- High noise attenuation for high-noise production and working environments
- Bulk pack of 200 pairs for operational stock requirements

Technical Data / Specifications

- Material: Soft PU
- Colour: Blue
- SNR value: 38 dB
- Version: Detectable
- Contents: 200 pairs
- Packaging unit: Piece
- Article reference: Art. 162
