Product data

Description

FINGERFIX Glove Stretcher – Shape Retention and Hygienic Drying of Protective Gloves

The FINGERFIX glove stretcher is an aid for stretching and drying protective and work gloves. It keeps gloves in shape after use, promotes even drying and thereby extends the service life of the gloves. The product is suitable for use in production, food processing, and kitchen and counter environments.

Product Features

- Retains the shape of work and protective gloves after use
- Promotes even and thorough drying from the inside
- Extends the service life of gloves through proper storage
- Suitable for use in food processing facilities, production and kitchen areas
- Easy handling without additional tools

Technical Data / Specifications

- Packaging unit: 100 pieces
