Product data

Manufacturer: Showa International (Netherlands) B.V.

Description

SHOWA Temres 282 Thermal Gloves – Hand Protection Against Cold in Production, Food Service and Counter Work

The SHOWA Temres 282 Thermal Gloves are thermally insulating protective gloves for use in areas with cold exposure. They are suitable for food processing, work at refrigerated counters, and tasks in production and warehousing at low temperatures. The gloves are designed to meet the requirements of commercial users and cover both hygiene-critical and production-related application scenarios.

Product Features

- Thermal insulation to protect hands during cold exposure
- Suitable for food processing as well as use at refrigerated counters and in kitchen operations
- Applicable in production and warehousing at low working temperatures
- Protects against hand cooling during prolonged handling of chilled or frozen goods
- Designed for continuous commercial use
