Description

Stainless Steel Soap Dispenser – Robust Wall-Mounted Solution for Commercial Use

The stainless steel soap dispenser with a capacity of 1 litre is designed for long-term use in commercial and industrial washroom environments. The stainless steel construction meets high standards of hygiene and durability, making it suitable for use in production facilities, workshops and other professional environments. The generous container volume reduces refill frequency and the associated maintenance effort.

Product Features

- Corrosion-resistant stainless steel housing for long-lasting use in wet environments
- Easy to clean and disinfect – suitable for high hygiene requirements
- Large capacity reduces refill intervals and maintenance effort

- Suitable for liquid soaps and disinfectants in commercial use
- Robust design for continuous operation in commercial washroom facilities
